Index

A

Abatement costs, 375–76, 375n, *table 21.1*
Abiotic resources, 75, 77–92, *table 5.1*, 429; market failures and, 185–200
Aboveground mineral stocks, 85–86, *fig. 5.2*, 194
Absolute advantage, 309, 316–17, 429
Absolute disadvantage, 334–36
Absorptive capacity. *See* Waste absorption capacity
Adaptive management, 362, 429
Advertising, 412–14
Aggregate macroeconomics, 223–27, 429
Agreement on Trade Related Aspects of Intellectual Property (TRIPs), 325
AIDS medicine, 167, 167n11
Alaska Permanent Plan, 400
Allocation, 3, 296–99, 429. *See also* Pareto efficient allocation
Annual profit maximization, 203–7, *fig. 12.2*, *box 12.1*
Aral Sea, 117
Aristotle, 42, 71
Arkwright, Richard, 326
Asian Tigers, 337–38
Asymmetric information, 412–14, 429
Atlantic cod fisheries, 162–63, *box 10.1*
Ayres, R. U., 84

B

Balance of payments (BOP), 344–46, 429
Barnes, Peter, 400–401
Barter, 245–46, 429
Basic market equation, 125–40, 429
Bass, Edward, 106
Berra, Yogi, 235
Berry, Wendell, 44–45
Biophysical equilibrium, 302–3, *fig. 16.6*
Biosphere Two, 106
Biotic resources, 75, 93–110, *table 6.2*, 429; abiotic resources vs., 77–78; market failures and, 201–19
Bond prices, 284–85, 300–301
Boulding, Kenneth, 39, 164n5, 181, 236, *box 13.1*
Bound energy, 65–66
Bretton Woods Institutions, 318–19, 429
Buffet, Warren, 393, 393n
Bush, George W., 330, *box 18.2*
Butz, Earl, 340, *box 18.3*
By-catch, 384, 384n6

C

Camdessus, Michel, 354
Cap and trade systems, 375n, 379–85
Capital account, 314, 344, 430
Capitalist circulation, 246
Capital mobility, 314–16, 346–48
Carnot, Sadi, 64, 66
Carrying capacity, 6, 98–100, 430
Cassowaries, 102, *box 6.3*
Catch-per-unit-effort hypothesis, 202–4, 202n2, *fig. 12.1*, 430
Circular flow, 24–26, *fig. 2.4*, 226–27, *fig. 13.1*, 263, 279, 430
Clausius, Rudolf, 65
Cleveland, Cutler J., 177n26
Clinton, Bill, 328, 330, *box 18.2*, 398n10
Closed system, 15, 68, 430
CO_2 emissions, 119, 361
Coase, Ronald, 176, 179, 325
Coase theorem, 176–77, 179, 430
Cobb, Clifford, 238
Cobb, John, 234
Cobb-Douglass production function, 151, 151n5
Coevolutionary economics, 7–10, 430
Cohen, Ben, 266
Command-and-control regulations, 374, 430
Commons, 161, 164–67, 334n17
Communicable diseases, 172–74
Community, 262, 267–68
Community Shareholder Ownership Programs (CSOPs), 397
Comparative advantage, 309–16, *table 17.1*
Competitive market, 126, 430
Complementarity, 149–50, 149n, 152–54, 430
Comprehensive efficiency, 422–23, 430
Congestibility, 159–60, *table 10.1*, 168, 430
Consilience (Berry), 45
Constant (local currency), 251
Consumer surplus, 143–45, *fig. 9.3*, 430
Contingent valuation, 407, *box 23.1*, 430–31
Copyright Act, 167
Critical depensation, 99, 101–3, *boxes 6.2,3*, 431
Crowding out, 290–91
CSOPs (Community Shareholder Ownership Programs), 397
Current account, 314, 344, 431

D

Daly, Herman, 234
Debt crises, 348–55, *box 19.1*
Defensive expenditures, 231–32, 431
Deflation, 293
Deforestation, 416–19, *fig. 23.1*
Demand, 24–26, *fig. 2.4*, 136–55, *figs. 8.2,4*, *figs. 9.1-3*, 431
Democritus, 47, *box 3.1*
Depletable, 89, 89n15
Depreciation, 233n8
Determinism, 44–47, *box 3.1*, 53, 431
Development, 6–7, 431
"Diamonds-water paradox," 197n, 247, *box 14.1*, 406
Differential rent. *See* Rent
Diminishing marginal physical product. *See* Law of diminishing marginal physical product
Diminishing marginal utility. *See* Law of diminishing marginal utility
Direct regulation, 373–76
Disinflation, 291–94, 431. *See also* Inflation
Dissipative structures, 55, 68n11
Distribution, 12–13, 259–76, *figs. 15.1,2*, 296–99, 431; justice in, 333–40, 363–65, 389–404. *See also* Intergenerational distribution

Double dividend, 385, 385n
Doubling time, 112, *box 7.1*, *fig. 7.1*, 431
Dualism, 37–43, 50, 54

E

Ecological constraints, 10–13
Ecological economics, 4, 425–28; distribution and, 262, 266–67; growth and, 13, 64; intertemporal distribution and, 269–70; IS-LM model and, 302–4, 302nn; optimal scale and, 226; production function and, 150–52
Ecological footprint, 34–35
Ecological reductionism, 50, *fig. 3.2*, 53–54, 431
Ecological tax reform, 145, 385–86
Economic equilibrium, 302–3, *fig. 16.6*
Economic imperialism, 50–53, *fig. 3.2*, 431
Economic stability, 348–55, *boxes 19.2,3*
Economist, The, 39
Economy as subsystem, 17–18, *fig. 2.1*, 34–35
Economy of scale, 127n
Ecosystem functions, 75, 93–97, 94n2, 118–19, 431
Ecosystem services, 21–22, *fig. 2.3*, 75, 97, 103–7, *tables 6.1,2*, 431; full world and, 118–19; globalization and, 328n11; GNP and, 237, 237n13; public goods and, 171, 171nn14,16; renewable resources and, 211, *fig. 12.4*. *See also* Fund-service resources; Natural capital; Nonmarket goods and services
Ecosystem structure, 93–97, 94nn1,2, 118–19, 432
"Efficiency of the commons," 165–67, *box 10.2*
Efficient allocation. *See* Pareto efficient allocation
Efficient cause, 71–72, *box 4.1*, 149–50, 432. *See also* Fund-service resources; Material cause
Ehrlich, Paul R., 44
Einstein, Albert, 24, 38n1, 46, 66
Eisley, Loren, 39
Elasticity, 146–48, *figs. 9.4,5*, 432; freshwater and, 197–98, *fig. 11.5*, 197n
Employee Shareholder Ownership Programs (ESOPs), 396–98
Empty-world vision, 17–18, *fig. 2.1*, 21, 111–21, 154, 302, 370
Ends and means, 3–5, 37–43
Ends-means spectrum, 48–50, *fig. 3.1*, 54, 129–30
Energy Information Administration, 113
Energy return on investment, 78–79
Entropic dissipation, 38, 432; mineral resources and, 84–86, *fig. 5.2*
Entropy. *See* Second Law of Thermodynamics
Entropy hourglass, 30–31, *box 2.2*
Environmental economics, 5, 432
Epicurus, 47, *box 3.1*
Equilibrium, 143–45, *fig. 9.2*
Equimarginal principle of maximization, 127–28, 128nn3,4, 130, 133, 432
ESOPs (Employee Shareholder Ownership Programs), 396–98, 398n10
Ether, 40, 40n10
Exchange rate, 344–46, 432
Exchange value, 28, 28n, 246–47, 246n, *box 14.1*, 256, 406, 432
Excludability, 72–74, 157–60, *table 10.1*, 164–68, 432; abiotic resources and, 88, 89, 92; biotic resources and, 109, *table 6.2*
Exclusion zones, 164
Exponential growth, 112, *box 7.1*, *fig. 7.1*, 247, 255–56, 432
Exports, 27, *fig. 2.5*
Externalities, 175–80, 176nn21-23, 432; of fossil fuels, 186–87, *table 11.1*, *figs. 11.2,3*; globalization and, 328–29; of mineral resources, 192–93, *table 11.2*

F

Fallacy of composition, 225, 432
Fallacy of misplaced concreteness, 30–33, 432–33
Federal Deposit Insurance Corporation (FDIC), 252
Federal Open Market Committee (FOMC), 300, 300n14
Federal Reserve System, 252, 254–55, 284, *box 16.3*, 299–300, *box 16.5*, 433
"Fiduciary issue," 249, *box 14.2*
Financial crises, 350–55, 350n8
Findlay, R., 310
Finite planet, 62–64
First Law of Thermodynamics, 30–32, *box 2.2*, 38, 65, 69, 433; mineral resources and, 83, 86; production function and, 151
Fiscal policy: globalization and, 346–48, 354–55; IS-LM model and, 289–99, *table 16.1*
