GENERAL INTRODUCTION . . . . .	xxix

---

## BOOK I.

### THE MEANING OF POLITICAL ECONOMY.

---

INTRODUCTION TO BOOK I . . . . .	7
----------------------------------	---

#### CHAPTER I.

##### THE THREE FACTORS OF THE WORLD.

SHOWING THE CONSTITUENTS OF ALL WE PERCEIVE.

Meaning of factor; and of philosophy; and of the world—What we call spirit—What we call matter—What we call energy—

Though these three may be at bottom one, we must separate them in thought—Priority of spirit . . . . . 9

CHAPTER II.

MAN, HIS PLACE AND POWERS.

SHOWING OUR RELATIONS TO THE GLOBE, AND THE QUALITIES THAT ENABLE US TO EXTEND OUR KNOWLEDGE OF IT AND OUR POWERS ON IT.

Man's earliest knowledge of his habitat—How that knowledge grows, and what civilized men now know of it—The essential distinction between man and other animals—In this lies his power of producing and improving . . . . . 11

CHAPTER III.

HOW MAN'S POWERS ARE EXTENDED.

SHOWING THAT THEIR USE OF REASON WELDS MEN INTO THE SOCIAL ORGANISM OR ECONOMIC BODY.

Extensions of man's powers in civilization—Due not to improvement in the individual but in the society—Hobbes's "Leviathan"—The Greater Leviathan—This capacity for good also capacity for evil . . . . . 19

CHAPTER IV.

CIVILIZATION — WHAT IT MEANS.

SHOWING THAT CIVILIZATION CONSISTS IN THE WELDING OF MEN INTO THE SOCIAL ORGANISM OR ECONOMIC BODY.

Vagueness as to what civilization is—Guizot quoted—Derivation and original meaning—Civilization and the State—Why a word referring to the precedent and greater has been taken from one referring to the subsequent and lesser . . . . . 24

CHAPTER V.

THE ORIGIN AND GENESIS OF CIVILIZATION.

SHOWING THE NATURE OF REASON; AND HOW IT IMPELS TO EXCHANGE, BY WHICH CIVILIZATION DEVELOPS.

Reason the power of tracing causal relations—Analysis and synthesis—Likeness and unlikeness between man and other ani-

mals—Powers that the apprehension of causal relations gives—  
Moral connotations of civilization—But begins with and in-  
creases through exchange—Civilization relative, and exists in  
the spiritual . . . . . 29

CHAPTER VI.

OF KNOWLEDGE AND THE GROWTH OF KNOWLEDGE.

SHOWING THAT THE GROWTH OF KNOWLEDGE IS BY COÖPER-  
ATION, AND THAT IT INHERES IN THE SOCIETY.

Civilization implies greater knowledge—This gain comes from  
coöperation—The incommunicable knowing called skill—The  
communicable knowing usually called knowledge—The rela-  
tion of systematized knowledge to the means of storing know-  
ledge, to skill and to the economic body—Illustration from as-  
tronomy . . . . . 39

CHAPTER VII.

OF SEQUENCE, CONSEQUENCE AND LAWS OF NATURE.

SHOWING THE PROPER MEANING OF SEQUENCE AND OF CON-  
SEQUENCE, AND WHY WE SPEAK OF LAWS OF NATURE.

Coexistence and succession—Sequence and consequence—Causes  
in series; names for them—Our direct knowledge is of spirit  
—Simplest perception of causal relation—Extensions of this—  
The causal search unsatisfied till it reaches spirit—And finds  
or assumes intent—Early evidences of this—Why we must  
assume a superior spirit—Evidences of intent—The word  
nature and its implication of will or spirit—The word law—  
The term "law of nature" . . . . . 44

CHAPTER VIII.

OF THE KNOWLEDGE PROPERLY CALLED SCIENCE.

SHOWING THAT SCIENCE DEALS ONLY WITH LAWS OF NATURE,  
AND THAT IN THE CURRENT POLITICAL ECONOMY THIS HAS  
BEEN FORGOTTEN.

Proper meaning of science—It investigates laws of nature, not  
laws of man—Distinction between the two—Their confusion  
in the current political economy—Mason and Lalor's "Primer  
of Political Economy" quoted—Absurdity of this confusion—  
Turgot on the cause of such confusions . . . . . 58

## CHAPTER IX.

## THE ECONOMY CALLED POLITICAL ECONOMY.

SHOWING THE MEANING, UNITS AND SCOPE OF POLITICAL ECONOMY.

	PAGE
The word economy—The word political—Origin of the term “political economy” and its confusions—It is not concerned with the body politic, but with the body economic—Its units, and the system or arrangement of which it treats—Its scope .	65

## CHAPTER X.

## THE ELEMENTS OF POLITICAL ECONOMY.

SHOWING HOW POLITICAL ECONOMY SHOULD PROCEED AND WHAT RELATIONS IT SEEKS TO DISCOVER.

How to understand a complex system—It is the purpose of such a system that political economy seeks to discover—These laws, natural laws of human nature—The two elements recognized by political economy—These distinguished only by reason—Human will affects the material world only through laws of nature—It is the active factor in all with which political economy deals . . . . .	74
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

## CHAPTER XI.

## OF DESIRES AND SATISFACTIONS.

SHOWING THE WIDTH AND IMPORTANCE OF THE FIELD OF POLITICAL ECONOMY.

Action springs from desire and seeks satisfaction—Order of desires—Wants or needs—Subjective and objective desires—Material and immaterial desires—The hierarchy of life and of desires . . . . .	81
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

## CHAPTER XII.

## THE FUNDAMENTAL LAW OF POLITICAL ECONOMY.

SHOWING THAT THE LAW FROM WHICH POLITICAL ECONOMY PROCEEDS IS THAT MEN SEEK TO SATISFY THEIR DESIRES WITH THE LEAST EXERTION.

Exertion followed by weariness—The fact that men seek to satisfy their desires with the least exertion—Meaning and analogue—Exemplified in trivial things—Is a law of nature and	
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

the fundamental law of political economy—Substitution of selfishness for this principle—Buckle quoted—Political economy requires no such assumption—The necessity of labor not a curse . . . . . 86

CHAPTER XIII.

METHODS OF POLITICAL ECONOMY.

SHOWING THE NATURE OF THE METHODS OF INVESTIGATION THAT MAY BE USED IN POLITICAL ECONOMY.

Deductive and inductive schools—"New American Cyclopaedia" quoted—Triumph of the inductionists—The method of induction and the method of deduction—Method of hypothesis. Bacon's relation to induction—Real error of the deductionists and the mistake of the inductionists—Lalor's Cyclopaedia quoted—Result of the triumph of the inductionists—A true science of political economy must follow the deductive method—Davis's "Elements of Inductive Logic" quoted—Double assurance of the real postulate of political economy—Method of mental or imaginative experiment . . . . . 92

CHAPTER XIV.

POLITICAL ECONOMY AS SCIENCE AND AS ART.

SHOWING THAT POLITICAL ECONOMY IS PROPERLY A SCIENCE, AND THE MEANING IT SHOULD HAVE IF SPOKEN OF AS ART.

Science and art—There must be a science of political economy, but no proper art—What must be the aim of an art of political economy—White art and black art—Course of further investigation . . . . . 101

BOOK II.

THE NATURE OF WEALTH.

INTRODUCTION TO BOOK II. . . . . 115

CHAPTER I.

CONFUSIONS AS TO THE MEANING OF WEALTH.

SHOWING THE FAILURE OF THE CURRENT POLITICAL ECONOMY TO DEFINE WEALTH, AND THE CONFUSIONS THEREFROM, CULMINATING IN THE ABANDONMENT OF POLITICAL ECONOMY BY ITS PROFESSED TEACHERS.

Wealth the primary term of political economy—Common use of the word—Vagueness more obvious in political economy—

	PAGE
Adam Smith not explicit—Increasing confusion of subsequent writers—Their definitions—Many make no attempt at definition—Perry's proposition to abandon the term—Marshall and Nicholson—Failure to define the term leads to the abandonment of political economy—This concealed under the word "economic"—The intent expressed by Macleod—Results to political economy . . . . .	117

## CHAPTER II.

## CAUSES OF CONFUSION AS TO THE MEANING OF WEALTH.

SHOWING THE REAL DIFFICULTY THAT BESETS THE ECONOMIC DEFINITION OF WEALTH.

Effect of slavery on the definition of wealth—Similar influences now existing—John S. Mill on prevalent delusions—Genesis of the protective absurdity—Power of special interests to mold common opinion—Of injustice and absurdity, and the power of special interests to pervert reason—Mill an example of how accepted opinions may blind men—Effect upon a philosophical system of the acceptance of an incongruity—Meaning of a saying of Christ—Influence of a class profiting by robbery shown in the development of political economy—Archbishop Whately puts the cart before the horse—The power of a great pecuniary interest to affect thought can be ended only by abolishing that interest—This shown in American slavery . 131

## CHAPTER III.

## WHAT ADAM SMITH MEANT BY WEALTH.

SHOWING HOW ESSENTIALLY ADAM SMITH'S PRIMARY CONCEPTION OF WEALTH DIFFERED FROM THAT NOW HELD BY HIS SUCCESSORS.

Significance of the title "Wealth of Nations"—Its origin shown in Smith's reference to the Physiocrats—His conception of wealth in his introduction—Objection by Malthus and by Macleod—Smith's primary conception that given in "Progress and Poverty"—His subsequent confusions . . . . . 143

## CHAPTER IV.

## THE FRENCH PHYSIOCRATS.

SHOWING WHO THE FIRST DEVELOPERS OF A TRUE SCIENCE OF POLITICAL ECONOMY WERE, AND WHAT THEY HELD.

Quesnay and his followers—The great truths they grasped and the cause of the confusion into which they fell—This used to discredit their whole system, but not really vital—They were

real free traders—The scant justice yet done them—Reference to them in "Progress and Poverty"—Macleod's statement of their doctrine of natural order—Their conception of wealth—Their day of hope and their fall . . . . . 148

## CHAPTER V.

## ADAM SMITH AND THE PHYSIOCRATS.

## SHOWING THE RELATION BETWEEN ADAM SMITH AND THE PHYSIOCRATS.

Smith and Quesnay—The "Wealth of Nations" and Physiocratic ideas—Smith's criticism of the Physiocrats—His failure to appreciate the single tax—His prudence . . . . . 160

## CHAPTER VI.

## SMITH'S INFLUENCE ON POLITICAL ECONOMY.

## SHOWING WHAT THE "WEALTH OF NATIONS" ACCOMPLISHED AND THE COURSE OF THE SUBSEQUENT DEVELOPMENT OF POLITICAL ECONOMY.

Smith, a philosopher, who addressed the cultured, and whose attack on mercantilism rather found favor with the powerful landowners—Not entirely exempt from suspicion of radicalism, yet pardoned for his affiliation with the Physiocrats—Efforts of Malthus and Ricardo on respectabilizing the science—The fight against the corn-laws revealed the true beneficiaries of protection, but passed for a free-trade victory, and much strengthened the incoherent science—Confidence of its scholastic advocates—Say's belief in the result of the colleges taking up political economy—Torrens's confidence—Failure of other countries to follow England's example—Cairnes doubts the effect of making it a scholastic study—His sagacity proved by the subsequent breakdown of Smith's economy—The true reason . . . . . 170

## CHAPTER VII.

## INEFFECTUAL GROPINGS TOWARD A DETERMINATION OF WEALTH.

## SHOWING THE OPPOSITION TO THE SCHOLASTIC ECONOMY BEFORE "PROGRESS AND POVERTY."

Illogical character of the "Wealth of Nations"—Statements of natural right—Spence, Ogilvie, Chalmers, Wakefield, Spencer, Dove, Bisset—Vague recognitions of natural right—Protection gave rise to no political economy in England, but did else-

	PAGE
where—Germany and protectionist political economy in the United States—Divergence of the schools—Trade-unionism in socialism . . . . .	182

#### CHAPTER VIII.

##### BREAKDOWN OF SCHOLASTIC POLITICAL ECONOMY.

SHOWING THE REASON, THE RECEPTION, AND EFFECT ON POLITICAL ECONOMY OF "PROGRESS AND POVERTY."

"Progress and Poverty"—Preference of professors to abandon the "science" rather than radically change it, brings the breakdown of scholastic economy—The "Encyclopædia Britannica"—The "Austrian school" that has succeeded the "classical" . . . . .	200
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

#### CHAPTER IX.

##### WEALTH AND VALUE.

SHOWING THE REASON FOR CONSIDERING THE NATURE OF VALUE BEFORE THAT OF WEALTH.

The point of agreement as to wealth—Advantages of proceeding from this point . . . . .	210
----------------------------------------------------------------------------------------	-----

#### CHAPTER X.

##### VALUE IN USE AND VALUE IN EXCHANGE.

SHOWING THE TWO SENSES OF VALUE; HOW THE DISTINCTION HAS BEEN IGNORED, AND ITS REAL VALIDITY; AND THE REASON FOR CONFINING THE ECONOMIC TERM TO ONE SENSE.

Importance of the term value—Original meaning of the word—Its two senses—Names for them adopted by Smith—Utility and desirability—Mill's criticism of Smith—Complete ignoring of the distinction by the Austrian school—Cause of this confusion—Capability of use not usefulness—Smith's distinction a real one—The dual use of one word in common speech must be avoided in political economy—Intrinsic value . . . . .	212
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

#### CHAPTER XI.

##### ECONOMIC VALUE—ITS REAL MEANING AND FINAL MEASURE.

SHOWING HOW VALUE IN EXCHANGE HAS BEEN DEEMED A RELATION OF PROPORTION; AND THE AMBIGUITY WHICH HAS LED TO THIS.

The conception of value as a relation of proportion—It is really a relation to exertion—Adam Smith's perception of this—His reasons for accepting the term value in exchange—His confusion and that of his successors . . . . .	226
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

CHAPTER XII.

VALUE IN EXCHANGE REALLY RELATED TO LABOR.

SHOWING THAT VALUE DOES NOT COME FROM EXCHANGEABILITY, BUT EXCHANGEABILITY FROM VALUE, WHICH IS AN EXPRESSION OF THE SAVING OF LABOR INVOLVED IN POSSESSION.

	PAGE
Root of the assumption that the sum of values cannot increase or diminish—The fundamental idea of proportion—We cannot really think of value in this way—The confusion that makes us imagine that we do—The tacit assumption and reluctance to examine that bolster the current notion—Imaginative experiment shows that value is related to labor—Common facts that prove this—Current assumption a fallacy of undistributed middle—Various senses of "labor"—Exertion positive and exertion negative—Re-statement of the proposition as to value—Of desire and its measurement—Causal relationship of value and exchangeability—Imaginative experiment showing that value may exist where exchange is impossible—Value and expression of exertion avoided . . . . .	235

CHAPTER XIII.

THE DENOMINATOR OF VALUE.

SHOWING WHAT VALUE IS, AND ITS RELATIONS.

What value is—The test of real value—Value related only to human desire—This perception at the bottom of the Austrian school—But its measure must be objective—How cost of production acts as a measure of value—Desire for similar things and for essential things—Application of this principle—Its relation to land values . . . . .	250
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

CHAPTER XIV.

THE TWO SOURCES OF VALUE.

SHOWING THAT THERE IS A VALUE FROM PRODUCTION AND ALSO A VALUE FROM OBLIGATION.

Value does not involve increase of wealth—Value of obligation—Of enslavement—Economic definition of wealth impossible without recognition of this difference in value—Smith's confusion and results—Necessity of the distinction—Value from production and value from obligation—Either gives the essential quality of commanding exertion—The obligation of debt—Other obligations—Land values most important of all forms of value from obligation—Property in land equivalent to property in men—Common meaning of value in exchange—Real relation with exertion—Ultimate exchangeability is for labor—Adam Smith right—Light thrown by this theory of value . . . . .	257
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

## CHAPTER XV.

## THE MEANING OF WEALTH IN POLITICAL ECONOMY.

SHOWING HOW VALUE FROM PRODUCTION IS WEALTH IN  
POLITICAL ECONOMY.

	PAGE
Wealth as fixed in "Progress and Poverty"—Course of the scholastic political economy—The reverse method of this work—The conclusion the same—Reason of the disposition to include all value as wealth—Metaphorical meanings—Bull and pun—Metaphorical meaning of wealth—Its core meaning—Its use to express exchangeability—Similar use of money—Ordinary core meaning the proper meaning of wealth—Its use in individual economy and in political economy—What is meant by increase of wealth—Wealth and labor—Its factors nature and man—Wealth their resultant—Of Adam Smith—Danger of carrying into political economy a meaning proper in individual economy—Example of "money"—"Actual wealth" and "relative wealth"—"Value from production" and "value from obligation"—The English tongue has no single word for an article of wealth—Of "commodities"—Of "goods"—Why there is no singular in English—The attempt to form one by dropping the "s" and Anglo-German jargon . . . . .	270

## CHAPTER XVI.

## THE GENESIS OF WEALTH.

SHOWING HOW WEALTH ORIGINATES AND WHAT IT ESSEN-  
TIALLY IS.

Reason of this inquiry—Wealth proceeds from exertion prompted by desire, but all exertion does not result in wealth—Simple examples of action, and of action resulting in wealth—"Riding and tying"—Sub-divisions of effort resulting in increments of wealth—Wealth essentially a stored and transferable service—Of transferable service—The action of reason as natural, though not as certain and quick as that of instinct—Wealth is service impressed on matter—Must be objective and have tangible form . . . . .	285
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

## CHAPTER XVII.

## THE WEALTH THAT IS CALLED CAPITAL.

SHOWING WHAT THE WEALTH CALLED CAPITAL REALLY IS.

Capital is a part of wealth used indirectly to satisfy desire—Simple illustration of fruit—Wealth permits storage of labor—The bull and the man—Exertion and its higher powers—Per-	
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

GENERAL CONTENTS.

xix

PAGE

sonal qualities cannot really be wealth or capital—The taboo and its modern form—Common opinion of wealth and capital 293

CHAPTER XVIII.

WHY POLITICAL ECONOMY CONSIDERS ONLY WEALTH.

SHOWING THAT POLITICAL ECONOMY, AS PROPERLY STATED, COVERS ALL THE RELATIONS OF MEN IN SOCIETY INTO WHICH IT IS NECESSARY TO INQUIRE.

Political economy does not include all the exertions for the satisfaction of material desires; but it does include the greater part of them, and it is through value that the exchange of services for services is made—its duty and province . . . 301

CHAPTER XIX.

MORAL CONFUSIONS AS TO WEALTH.

SHOWING HOW RICH AND POOR ARE CORRELATIVES, AND WHY CHRIST SYMPATHIZED WITH THE POOR.

The legitimacy of wealth and the disposition to regard it as sordid and mean—The really rich and the really poor—They are really correlatives—The good sense of Christ's teaching . . . 304

CHAPTER XX.

OF THE PERMANENCE OF WEALTH.

SHOWING THAT VALUES FROM OBLIGATION SEEM REALLY TO LAST LONGER THAN VALUES FROM PRODUCTION.

Value from production and value from obligation—The one material and the other existing in the spiritual—Superior permanence of the spiritual—Shakespeare's boast—Mæcenas's buildings and Horace's odes—The two values now existing—Franchises and land values last longer than gold and gems—Destruction in social advance—Conclusions from all this . . . 308

CHAPTER XXI.

THE RELATION OF MONEY TO WEALTH.

SHOWING THAT SOME MONEY IS AND SOME MONEY IS NOT WEALTH.

Where I shall treat of money—No categorical answer can yet be given to the question whether money is wealth—Some money is and some is not, wealth . . . . . 313

BOOK III.

THE PRODUCTION OF WEALTH.

CHAPTER I.

THE MEANING OF PRODUCTION.

SHOWING THE MEANING AND PROPER USE OF PRODUCTION.

	PAGE
Production a drawing forth of what before exists—Its difference from creation—Production other than of wealth—Includes all stages of bringing to be—Mistakes as to it . . . . .	323

CHAPTER II.

THE THREE MODES OF PRODUCTION.

SHOWING THE COMMON CHARACTER, YET DIFFERENT MODES OF PRODUCTION.

Production involves change, brought about by conscious will—Its three modes: (1) adapting, (2) growing, (3) exchanging—This the natural order of these modes . . . . .	327
------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

CHAPTER III.

POPULATION AND SUBSISTENCE.

SHOWING THAT THE THEORY OF A TENDENCY IN POPULATION TO INCREASE FASTER THAN SUBSISTENCE HAS PREVIOUSLY BEEN EXAMINED AND CONDEMNED.

The Malthusian theory—Discussed in "Progress and Poverty" .	333
-------------------------------------------------------------	-----

CHAPTER IV.

THE ALLEGED LAW OF DIMINISHING RETURNS IN AGRICULTURE.

SHOWING WHAT THIS ALLEGED LAW IS.

John Stuart Mill quoted as to the importance, relations and nature of this law—The <i>reductio ad absurdum</i> by which it is proved—Contention that it is a misapprehension of the universal law of space . . . . .	335
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

## CHAPTER V.

## OF SPACE AND TIME.

SHOWING THAT HUMAN REASON IS ONE, AND SO FAR AS IT  
CAN GO MAY BE RELIED ON.

Purpose of this work—Of metaphysics—Danger of thinking of words as things—Space and time not conceptions of things, but of relations of things—They cannot, therefore, have independent beginning or ending—The verbal habit which favors this idea—How favored by poets and by religious teachers—How favored by philosophers—Of Kant—Of Schopenhauer—Mysteries and antinomies that are really confusions in the meaning of words—Human reason and the eternal reason—Philosophers who are really word-jugglers . . . . 339

## CHAPTER VI.

## CONFUSION OF THE SPACIAL LAW WITH AGRICULTURE.

SHOWING THE GENESIS OF THIS CONFUSION.

What space is—The place to which man is confined—Extension a part of the concept, land—Perception is by contrast—Man's first use of land is by the mode of adapting—His second, and for a long time most important, use is by growing—The third, on which civilization is now entering, is exchanging—Political economy began in the second, and growing still attracts most attention—The truth and error of the Physiocrats—The successors of Smith, while avoiding the error of the Physiocrats, also ignored their truth; and with their acceptance of the Malthusian theory, and Ricardo's explanation of rent as relating to agricultural land, they fell into, and have continued the habit of treating land and rent as agricultural—Difficulty of the single tax in the United States . . . . 351

## CHAPTER VII.

## THE RELATION OF SPACE IN PRODUCTION.

SHOWING THAT SPACE HAS RELATION TO ALL MODES OF  
PRODUCTION.

Matter being material, space must have relation to all production—This relation readily seen in agriculture—The concentration of labor in agriculture tends up to a certain point to increase and then to diminish production—But it is a misapprehension to attribute this law to agriculture or to the mode of growing—It holds in all modes and sub-divisions of

these modes—Instances: of the production of brick, of the mere storage of brick—Man himself requires space—The division of labor as requiring space—Intensive and extensive use of land 357

CHAPTER VIII.

THE RELATION OF TIME IN PRODUCTION.

SHOWING THAT ALL MODES OF PRODUCTION HAVE RELATION TO TIME.

Difference between apprehensions of space and time, the one objective, the other subjective—Of spirits and of creation—All production requires time—The concentration of labor in time . . . . . 365

CHAPTER IX.

COÖPERATION—ITS TWO WAYS.

SHOWING THE TWO WAYS OF COÖPERATION.

Coöperation is the union of individual powers in the attainment of common ends—Its ways and their analogues: (1) the combination of effort; (2) the separation of effort—Illustrations: of building houses, of joint-stock companies, etc.—Of sailing a boat—The principle shown in naval architecture—The Erie Canal—The baking of bread—Production requires conscious thought—The same principle in mental effort—What is on the one side separation is on the other concentration—Extent of concentration and specialization of work in modern civilization—The principle of the machine—Beginning and increase of division of labor—Adam Smith's three heads—A better analysis. . . . . 371

CHAPTER X.

COÖPERATION—ITS TWO KINDS.

SHOWING THE TWO KINDS OF COÖPERATION, AND HOW THE POWER OF THE ONE GREATLY EXCEEDS THAT OF THE OTHER.

The kind of coöperation which, as to method of union or how of initiation, results from without and may be called directed or conscious coöperation—Another proceeding from within which may be called spontaneous or unconscious coöperation—Types of the two kinds and their analogues—Tacking of a full-rigged ship and of a bird—Intelligence that suffices for the one impossible for the other—The savage and the ship—Unconscious coöperation required in ship-building—Conscious coöperation will not suffice for the work of unconscious—The fatal defect of socialism—The reason of this is that the power of thought is spiritual and cannot be fused as can physical

force—Of “man power” and “mind power”—Illustration from the optician—Impossibility of socialism—Society a Leviathan greater than that of Hobbes . . . . . 382

## CHAPTER XI.

## THE OFFICE OF EXCHANGE IN PRODUCTION.

SHOWING THAT IN MAN THE LACK OF INSTINCT IS SUPPLIED BY THE HIGHER QUALITY OF REASON, WHICH LEADS TO EXCHANGE.

The coöperation of ants and bees is from within and not from without; from instinct and not from direction—Man has little instinct; but the want supplied by reason—Reason shows itself in exchange—This suffices for the unconscious coöperation of the economic body or Greater Leviathan—Of the three modes of production, exchanging is the highest—Mistake of writers on political economy—The motive of exchange . . . 397

## CHAPTER XII.

## OFFICE OF COMPETITION IN PRODUCTION.

SHOWING THAT COMPETITION BRINGS TRADE, AND CONSEQUENTLY SERVICE, TO ITS JUST LEVEL.

“Competition is the life of trade,” an old and true adage—The assumption that it is an evil springs from two causes—one bad, the other good—The bad cause at the root of protectionism—Law of competition a natural law—Competition necessary to civilization . . . . . 402

## CHAPTER XIII.

## OF DEMAND AND SUPPLY IN PRODUCTION . 404

## CHAPTER XIV.

## ORDER OF THE THREE FACTORS OF PRODUCTION.

SHOWING THE AGREEMENT OF ALL ECONOMISTS AS TO THE NAMES AND ORDER OF THE FACTORS OF PRODUCTION.

Land and labor necessary elements in production—Union of a composite element, capital—Reason for dwelling on this agreement as to order . . . . . 405

## CHAPTER XV.

## THE FIRST FACTOR OF PRODUCTION—LAND.

SHOWING THAT LAND IS THE NATURAL OR PASSIVE FACTOR IN ALL PRODUCTION.

The term land—Landowners—Labor the only active factor . . . 408

## CHAPTER XVI.

THE SECOND FACTOR OF PRODUCTION—LABOR.  
SHOWING THAT LABOR IS THE HUMAN OR ACTIVE FACTOR  
IN ALL PRODUCTION.

	PAGE
The term labor—It is the only active factor in producing wealth, and by nature spiritual . . . . .	411

## CHAPTER XVII.

THE THIRD FACTOR OF PRODUCTION—CAPITAL.  
SHOWING THAT CAPITAL IS NOT A PRIMARY FACTOR, BUT PROCEEDS  
FROM LAND AND LABOR, AND IS A FORM OR USE OF WEALTH.

Capital is essentially labor raised to a higher power—Where it may, and where it must aid labor—In itself it is helpless . . . . .	413
---------------------------------------------------------------------------------------------------------------------------------------	-----

## BOOK IV.

## THE DISTRIBUTION OF WEALTH.

INTRODUCTION TO BOOK IV. . . . .	421
----------------------------------	-----

## CHAPTER I.

## THE MEANING OF DISTRIBUTION.

SHOWING THE MEANING AND USES OF THE WORD DISTRIBUTION;  
THE PLACE AND MEANING OF THE ECONOMIC TERM; AND THAT  
IT IS CONCERNED ONLY WITH NATURAL LAWS.

Derivation and uses of the word—Exchange, consumption and taxation not proper divisions of political economy—Need of a consideration of distribution—It is the continuation and end of what begins in production, and thus the final division of political economy—The meaning usually assigned to distribu- tion as an economic term, and its true meaning . . . . .	423
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

## CHAPTER II.

## THE NATURE OF DISTRIBUTION.

SHOWING THE FALLACY OF THE CONTENTION THAT DISTRIBUTION  
IS A MATTER OF HUMAN LAW; THAT THE NATURAL LAWS OF  
DISTRIBUTION ARE MANIFEST NOT ON WEALTH ALREADY PRO-  
DUCED, BUT ON SUBSEQUENT PRODUCTION; AND THAT THEY ARE  
MORAL LAWS.

John Stuart Mill's argument that distribution is a matter of hu- man law—Its evidence of the unscientific character of the	
-------------------------------------------------------------------------------------------------------------------------------	--

scholastic economy—The fallacy it involves and the confusion it shows—Illustration from Bedouin and from civilized society—Natural laws of distribution do not act upon wealth already produced, but on future production—Reason of this—Illustration of siphon and analogy of blood . . . . . 430

CHAPTER III.

THE COMMON PERCEPTION OF NATURAL LAW IN DISTRIBUTION.

SHOWING THE COMMON AND INERADICABLE PERCEPTION OF NATURAL LAWS OF DISTRIBUTION.

Mill's admission of natural law in his argument that distribution is a matter of human law—Sequence and consequence—Human will and the will manifest in nature—Inflexibility of natural laws of distribution—Human will powerless to affect distribution—This shown by attempts to affect distribution through restriction of production—Mill's confusion and his high character . . . . . 440

CHAPTER IV.

THE REAL DIFFERENCE BETWEEN LAWS OF PRODUCTION AND OF DISTRIBUTION.

SHOWING THAT DISTRIBUTION HAS REFERENCE TO ETHICS, WHILE PRODUCTION HAS NOT.

The laws of production are physical laws; the laws of distribution moral laws, concerned only with spirit—This the reason why the immutable character of the laws of distribution is more quickly and clearly recognized . . . . . 450

CHAPTER V.

OF PROPERTY.

SHOWING THAT PROPERTY DEPENDS UPON NATURAL LAW.

The law of distribution must be the law which determines ownership—John Stuart Mill recognizes this; but extending his error, treats property as a matter of human institution solely—His assertion quoted and examined—His utilitarianism—His further contradictions . . . . . 454

CHAPTER VI.

CAUSE OF CONFUSION AS TO PROPERTY.

SHOWING WHY AND HOW POLITICAL ECONOMISTS FELL INTO SUCH CONFUSIONS WITH REGARD TO PROPERTY.

Mill blinded by the pre-assumption that land is property—He all but states later the true principle of property, but recovers by

	PAGE
substituting in place of the economic term "land," the word in its colloquial use—The different senses of the word illustrated from the shore of New York harbor—Mill attempts to justify property in land, but succeeds only in justifying property in wealth . . . . .	460

---

## BOOK V.

### MONEY—THE MEDIUM OF EXCHANGE AND MEASURE OF VALUE.

---

INTRODUCTION TO BOOK V. . . . .	477
---------------------------------	-----

#### CHAPTER I.

##### CONFUSIONS AS TO MONEY.

SHOWING THE DIVERGENCE IN COMMON THOUGHT AND AMONG ECONOMISTS AS TO MONEY.

Present confusions as to money—Their cause—How to disentangle them . . . . .	479
------------------------------------------------------------------------------	-----

#### CHAPTER II.

##### THE COMMON UNDERSTANDING OF MONEY.

SHOWING THAT THE COMMON USE OF MONEY IS TO BUY THINGS WITH, AND THAT ITS ESSENTIAL CHARACTER IS NOT IN ITS MATERIAL, BUT IN ITS USE.

The use of money to exchange for other things—Buying and selling—Illustration of the travelers—Money not more valuable than other things, but more readily exchangeable—Exchanges without money—Checks, etc., not money—Different money in different countries—But money not made by government fiat—Does not necessarily consist of gold and silver—Or need intrinsic value—Its essential quality and definition . . . . .	482
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

#### CHAPTER III.

##### MEDIUM OF EXCHANGE AND MEASURE OF VALUE.

SHOWING HOW THE COMMON MEDIUM OF EXCHANGE BECOMES THE COMMON MEASURE OF VALUE, AND WHY WE CANNOT FIND A COMMON MEASURE IN LABOR.

Money is most exchanged—Why not measure value by labor?—Smith's unsatisfactory answer—The true answer—Labor can afford no common measure, and commodities are preferably	
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

taken—Survivals of common measures—Difference in common measures does not prevent exchange . . . . . 495

CHAPTER IV.

THE OFFICE OF CREDIT IN EXCHANGES.

SHOWING THAT THE ADVANCE OF CIVILIZATION ECONOMIZES THE USE OF MONEY.

Tendency to over-estimate the importance of money—Credit existed before the use of money began—And it is now and always has been the most important instrument of exchange—Illustration of shipwrecked men—Adam Smith's error as to barter—Money's most important use to-day is as a measure of value . . . . . 504

CHAPTER V.

THE GENESIS OF MONEY.

SHOWING THAT THE LAW OF GRATIFYING DESIRES WITH THE LEAST EXERTION PROMPTS THE USE FROM TIME TO TIME OF THE MOST LABOR-SAVING MEDIUM AVAILABLE.

Money not an invention, but developed by civilization—It grows with the growth of exchanges—Exchange first of general commodities—Then of the more convenient commodities—Then of coin, whose commodity value comes to be forgotten—Illustration of the American trade dollar—The lessening uses of commodity money and extensions of credit money—Two elements in exchange value of metal coin: intrinsic, or value of the metal itself; and seigniorage—Meaning of seigniorage—Exchange value of paper money is seigniorage—Use of money is not for consumption, but exchange—Proprietary articles as mediums of exchange—Mutilated coins—When lessening metal value in coins does not lessen circulating value—The essential being that both represent the same exertion—This the reason why paper money exchanges equally with metal money of like denomination . . . . . 512

CHAPTER VI.

THE TWO KINDS OF MONEY.

SHOWING THAT ONE ORIGINATES IN VALUE FROM PRODUCTION AND THE OTHER IN VALUE FROM OBLIGATION.

Money peculiarly the representative of value—Two kinds of money in the more highly civilized world—Commodity money and value from production—Credit money and value from obligation—Of credit money—Of commodity money—Of intrinsic value—Gold coin the only intrinsic value money now in circulation in the United States, England, France or Germany 526
