*War, Taxes and Politics in the Light of  
Ethical Principles*

By **GILBERT M. TUCKER**

A discussion of the underlying principles to which we must turn if we are to avoid the calamities which followed World War I. No detailed program is offered: rather is the emphasis on the natural and ethical laws upon which we must build, to find a way out of the disasters and chaos of the past, for only on sound foundations can we have prosperity and enduring peace. To show how these principles must be applied to our social and political order is the purpose of this book.

Mr. Tucker has taught, lectured and written on these questions of which he has made a study for many years and, through newspaper contacts, has had the opportunity to make a close study of many political problems. He is the author of numerous newspaper and periodical articles and of one book, "The Path to Prosperity."

An authoritative book clearly and simply written, which cannot but help provoke thought and excite wide discussion at the present moment.

This book has been manufactured in this form in compliance with orders of the War Production Board for the conservation of paper and other materials necessary for the prosecution of the War.
