GENERAL CONTENTS.

GRAND DIVISIONS.

GENERAL INTRODUCTION.
BOOK I.—THE MEANING OF POLITICAL ECONOMY.
BOOK II.—THE NATURE OF WEALTH.
BOOK III.—THE PRODUCTION OF WEALTH.
BOOK IV.—THE DISTRIBUTION OF WEALTH.
BOOK V.—MONEY—THE MEDIUM OF EXCHANGE AND MEASURE OF VALUE.

SUB-DIVISIONS.

GENERAL INTRODUCTION . XXIX

BOOK I.

THE MEANING OF POLITICAL ECONOMY.

INTRODUCTION TO BOOK I . . . . . 7

CHAPTER I.

THE THREE FACTORS OF THE WORLD.
SHOWING THE CONSTITUENTS OF ALL WE PERCEIVE.
Meaning of factor; and of philosophy; and of the world—What we call spirit—What we call matter—What we call energy—
GENERAL CONTENTS.

Though these three may be at bottom one, we must separate them in thought—Priority of spirit . . . . . . 9

CHAPTER II.
MAN, HIS PLACE AND POWERS.
SHOWING OUR RELATIONS TO THE GLOBE, AND THE QUALITIES THAT ENABLE US TO EXTEND OUR KNOWLEDGE OF IT AND OUR POWERS ON IT.

Man's earliest knowledge of his habitat—How that knowledge grows, and what civilized men now know of it—The essential distinction between man and other animals—In this lies his power of producing and improving . . . . . . 11

CHAPTER III.
HOW MAN'S POWERS ARE EXTENDED.
SHOWING THAT THE USE OF REASON WELDS MEN INTO THE SOCIAL ORGANISM OR ECONOMIC BODY.

Extensions of man's powers in civilization—Due not to improvement in the individual but in the society—Hobbes's "Leviathan"—The Greater Leviathan—This capacity for good also capacity for evil . . . . . . . . . . 19

CHAPTER IV.
CIVILIZATION—WHAT IT MEANS.
SHOWING THAT CIVILIZATION CONSISTS IN THE WELDING OF MEN INTO THE SOCIAL ORGANISM OR ECONOMIC BODY.

Vagueness as to what civilization is—Quintess quoted—Derivation and original meaning—Civilization and the State—Why a word referring to the precedent and greater has been taken from one referring to the subsequent and lesser . . . . . . 24

CHAPTER V.
THE ORIGIN AND GENESIS OF CIVILIZATION.
SHOWING THE NATURE OF REASON; AND HOW IT IMPELS TO EXCHANGE, BY WHICH CIVILIZATION DEVELOPS.

Reason the power of tracing causal relations—Analysis and synthesis—Likeness and unlikeness between man and other ani-
CHAPTER VI.

OF KNOWLEDGE AND THE GROWTH OF KNOWLEDGE.

SHOWING THAT THE GROWTH OF KNOWLEDGE IS BY COOPERATION, AND THAT IT INCREASES IN THE SOCIETY.

Civilization implies greater knowledge—This gain comes from cooperation—The incommunicable knowing called skill—The communicable knowing usually called knowledge—The relation of systematized knowledge to the means of storing knowledge, to skill and to the economic body—Illustration from astronomy

CHAPTER VII.

OF SEQUENCE, CONSEQUENCE AND LAWS OF NATURE.

SHOWING THE PROPER MEANING OF SEQUENCE AND OF CONSEQUENCE, AND WHY WE SPEAK OF LAWS OF NATURE.

Coexistence and succession—Sequence and consequence—Causes in series; names for them—Our direct knowledge is of spirit—Simplest perception of causal relation—Extensions of this—The causal search unsatisfied till it reaches spirit—And finds or assumes intent—Early evidences of this—Why we must assume a superior spirit—Evidences of intent—The word nature and its implication of will or spirit—The word law—The term "law of nature".

CHAPTER VIII.

OF THE KNOWLEDGE PROPERLY CALLED SCIENCE.

SHOWING THAT SCIENCE DEALS ONLY WITH LAWS OF NATURE, AND THAT IN THE CURRENT POLITICAL ECONOMY THIS HAS BEEN FORGOTTEN.

Proper meaning of science—It investigates laws of nature, not laws of man—Distinction between the two—Their confusion in the current political economy—Mason and Latar's "Primer of Political Economy" quoted—Absurdity of this confusion—Target of the cause of such confusions.
GENERAL CONTENTS.

CHAPTER IX.
THE ECONOMY CALLED POLITICAL ECONOMY.
SHOWING THE MEANING, UNITS AND SCOPE OF POLITICAL ECONOMY.

The word economy—The word political—Origin of the term "political economy" and its confusions—It is not concerned with the body politic, but with the body economic—Its units, and the system or arrangement of which it treats—Its scope.

CHAPTER X.
THE ELEMENTS OF POLITICAL ECONOMY.
SHOWING HOW POLITICAL ECONOMY SHOULD PROCEED AND WHAT RELATIONS IT SEeks TO DISCOVER.

How to understand a complex system—It is the purpose of such a system that political economy seeks to discover—These laws, natural laws of human nature—The two elements recognized by political economy—These distinguished only by reason—Human will affects the material world only through laws of nature—It is the active factor in all with which political economy deals.

CHAPTER XI.
OF DESIRES AND SATISFACTIONS.
SHOWING THE WIDTH AND IMPORTANCE OF THE FIELD OF POLITICAL ECONOMY.

Action springs from desire and seeks satisfaction—Order of desires—Wants or needs—Subjective and objective desires—Material and immaterial desires—The hierarchy of life and of desires.

CHAPTER XII.
THE FUNDAMENTAL LAW OF POLITICAL ECONOMY.
SHOWING THAT THE LAW FROM WHICH POLITICAL ECONOMY PROCEEDS IS THAT MEN SEEK TO SATISFY THEIR DESIRES WITH THE LEAST EXERTION.

Exertion followed by weariness—The fact that men seek to satisfy their desires with the least exertion—Meaning and analogue—Exemplified in trivial things—is a law of nature and
CHAPTER XIII.

THE METHODS OF POLITICAL ECONOMY.

SHOWING THE NATURE OF THE METHODS OF INVESTIGATION THAT MAY BE USED IN POLITICAL ECONOMY.

Deductive and inductive schools—"New American Cyclopedia" quoted—Triumph of the inductionists—The method of induction and the method of deduction—Method of hypothesis. Bacon's relation to induction—Real error of the deductionists and the mistake of the inductionists—Lalor's Cyclopedia quoted—Result of the triumph of the inductionists—A true science of political economy must follow the deductive method—Davis's "Elements of Inductive Logic" quoted—Double assurance of the real postulate of political economy—Method of mental or imaginative experiment.

CHAPTER XIV.

POLITICAL ECONOMY AS SCIENCE AND AS ART.

SHOWING THAT POLITICAL ECONOMY IS PROPERLY A SCIENCE, AND THE MEANING IT SHOULD HAVE IF SPOKEN OF AS ART.

Science and art—There must be a science of political economy, but no proper art—What must be the aim of an art of political economy—White art and black art—Course of further investigation.

BOOK II.

THE NATURE OF WEALTH.

INTRODUCTION TO BOOK II.

CHAPTER I.

CONFUSIONS AS TO THE MEANING OF WEALTH.

SHOWING THE FAILURE OF THE CURRENT POLITICAL ECONOMY TO DEFINE WEALTH, AND THE CONFESSIONS THEREFROM, CULMINATING IN THE ABANDONMENT OF POLITICAL ECONOMY BY ITS PROFESSORS TRAJECTORS.

Wealth the primary term of political economy—Common use of the word—Vagueness more obvious in political economy—
GENERAL CONTENTS.

PAGE

Adam Smith not explicit—Increasing confusion of subsequent writers—Their definitions—May make no attempt at definition—Perry's proposition to abandon the term—Marshall and Nicholson—Failure to define the term leads to the abandonment of political economy—This concealed under the word "economic"—The intent expressed by Macleod—Results to political economy.... . 117

CHAPTER II.

CAUSES OF CONFUSION AS TO THE MEANING OF WEALTH.

SHOWING THE REAL DIFFICULTY THAT DESECTS THE ECONOMIC DEFINITION OF WEALTH.

Effect of slavery on the definition of wealth—Similar influences now existing—John S. Mill on prevalent delusions—Genesis of the protective absurdity—Power of special interests to mold common opinion—Of injustice and absurdity, and the power of special interests to pervert reason—Mill as an example of how accepted opinions may blind men—Effect upon a philosophical system of the acceptance of an incongruity—Meaning of a saying of Christ—Influence of a class profiting by robbery shown in the development of political economy—Archbishop Whately puts the cart before the horse—The power of a great pecuniary interest to affect thought can be ended only by abolishing that interest—This shown in American slavery . 131

CHAPTER III.

WHAT ADAM SMITH MEANT BY WEALTH.

SHOWING HOW ESSENTIALLY ADAM SMITH'S PRIMARY CONCEPTION OF WEALTH DIFFERED FROM THAT NOW HELD BY HIS SUCCESSORS.

Significance of the title "Wealth of Nations"—Its origin shown in Smith's reference to the Physiocrats—His conception of wealth in his introduction—Objection by Malthus and by Macleod—Smith's primary conception that given in "Progress and Poverty"—His subsequent confusions .... 143

CHAPTER IV.

THE FRENCH PHYSIOCRATS.

SHOWING WHO THE FIRST DEVELOPERS OF A TRUE SCIENCE OF POLITICAL ECONOMY WERE, AND WHAT THEY HELD.

Quesnay and his followers—The great truths they grasped and the cause of the confusion into which they fell—This used to discredit their whole system, but not really vital—They were
real free traders—The scant justice yet done them—Reference to them in "Progress and Poverty"—Macleod's statement of their doctrine of natural order—Their conception of wealth—Their day of hope and their fall

CHAPTER V.

ADAM SMITH AND THE PHYSIOCRATS.

SHOWING THE RELATION BETWEEN ADAM SMITH AND THE

PHYSIOCRATS.

Smith and Quesnay—The "Wealth of Nations" and Physiocratic ideas—Smith's criticism of the Physiocrats—His failure to appreciate the single tax—His prudence

CHAPTER VI.

SMITH'S INFLUENCE ON POLITICAL ECONOMY.

SHOWING WHAT THE "WEALTH OF NATIONS" ACCOMPLISHED AND THE COURSE OF THE SUBSEQUENT DEVELOPMENT OF POLITICAL ECONOMY.

Smith, a philosopher, who addressed the cultured, and whose attack on mercantilism rather found favor with the powerful landlord—Not entirely exempt from suspicion of radicalism, yet pardoned for his affiliation with the Physiocrats—Efforts of Malthus and Ricardo on re-establishing the science—The fight against the corn-laws revealed the true beneficiaries of protection, but passed for a free-trade victory, and much strengthened the incoherent science—Confidence of its scholastic advocates—Say's belief in the result of the colleges taking up political economy—Torrens's confidence—Failure of other countries to follow England's example—Calmer doubts the effect of making it a scholastic study—His sagacity proved by the subsequent breakdown of Smith's economy—The true reason

CHAPTER VII.

INEFFECTUAL GROPINGS TOWARD A DETERMINATION OF WEALTH.

SHOWING THE OPPOSITION TO THE SCHOLASTIC ECONOMY BEFORE "PROGRESS AND POVERTY."

Logical character of the "Wealth of Nations"—Statements of natural right—Spence, Ogilvie, Chalmers, Wakefield, Spencer, Dove, Bisset—Vague recognitions of natural right—Protection gave rise to no political economy in England, but did else
where—Germany and protectionist political economy in the
United States—Divergence of the schools—Trade-unionism
in socialism . . . . 182

CHAPTER VIII.
BREAKDOWN OF SCHOLASTIC POLITICAL ECONOMY.
SHOWING THE REASON, THE RECEPTION, AND EFFECT ON PO-
LITICAL ECONOMY OF "PROGRESS AND POVERTY."
"Progress and Poverty"—Preferences of professors to abandon
the "science" rather than radically change it, brings the break-
down of scholastic economy—The "Encyclopædia Britannica"
—The "Austrian school" that has succeeded the "classical" 200

CHAPTER IX.
WEALTH AND VALUE.
SHOWING THE REASON FOR CONSIDERING THE NATURE OF
VALUE BEFORE THAT OF WEALTH.
The point of agreement as to wealth—Advantages of proceeding
from this point . . . . . . 210

CHAPTER X.
VALUE IN USE AND VALUE IN EXCHANGE.
SHOWING THE TWO SENSES OF VALUE; HOW THE DISTIN-
CTION HAS BEEN IGNORED, AND ITS REAL VALIDITY; AND THE REASON
FOR CONFUSING THE ECONOMIC TERM TO ONE SENSE.
Importance of the term value—Original meaning of the word—
Its two senses—Names for them adopted by Smith—Utility
and desirability—Mill's criticism of Smi h—Complete ignor-
ing of the distinction by the Austrian school—Cause of this
confusion—Capability of use not usefulness—Smith's distinc-
tion a real one—The dual use of one word in common speech
must be avoided in political economy—Intrinsic value . . 212

CHAPTER XI.
ECONOMIC VALUE—ITS REAL MEANING AND FINAL
MEASURE.
SHOWING HOW VALUE IN EXCHANGE HAS BEEN DEEMED A RELATION
OF PROPORTION; AND THE AMBIGUITY WHICH HAS LED TO THIS.
The conception of value as a relation of proportion—It is really
a relation to exertion—Adam Smith's perception of this—His
reasons for accepting the term value in exchange—His con-
fusion and that of his successors . . . . . 226
CHAPTER XII.
VALUE IN EXCHANGE REALLY RELATED TO LABOR.
SHOWING THAT VALUE DOES NOT COME FROM EXCHANGEABILITY,
BUT EXCHANGEABILITY FROM VALUE, WHICH IS AN EXPRESSION
OF THE SAVINGS OF LABOR INVOLVED IN POSSESSION.

Root of the assumption that the sum of values cannot increase
or diminish—The fundamental idea of proportion—We cannot
really think of value in this way—The confusion that
makes us imagine that we do—The tacit assumption and re-

distance to examine that bolster the current notion—Imagina-
tive experiment shows that value is related to labor—Common
facts that prove this—Current assumption a fallacy of undis-
tributed middle—Various senses of "labor"—Exertion positive
and exertion negative—Re-statement of the proposition as to
value—Of desire and its measurement—Causal relationship of
value and exchangeability—Imaginative experiment showing
that value may exist where exchange is impossible—Value and
expression of exertion avoided

CHAPTER XIII.
THE DENOMINATOR OF VALUE.
SHOWING WHAT VALUE IS, AND ITS RELATIONS.
What value is—The test of real value—Value related only to
human desire—This perception at the bottom of the Austrian
school—but its measure must be objective—How cost of
production acts as a measure of value—Desire for similar
things and for essential things—Application of this principle—
Its relation to land values

CHAPTER XIV.
THE TWO SOURCES OF VALUE.
SHOWING THAT THERE IS A VALUE FROM PRODUCTION AND
ALSO A VALUE FROM OBLIGATION.
Value does not involve increase of wealth—Value of obligation
—Of enslavement—Economic definition of wealth impossible
without recognition of this difference in value—Smith's con-
fusion and results—Necessity of the distinction—Value from
production and value from obligation—Either gives the essen-
tial quality of commanding exertion—The obligation of debt—
Other obligations—Land values most important of all forms
of value from obligation—Property in land equivalent to
property in men—Common meaning of value in exchange—
Real relation with exertion—Ultimate exchangeability is for
labor—Adam Smith right—Light thrown by this theory of
value
CHAPTER XV.
THE MEANING OF WEALTH IN POLITICAL ECONOMY.
SHOWING HOW VALUE FROM PRODUCTION IS WEALTH IN
POLITICAL ECONOMY.

Wealth as fixed in "Progress and Poverty."—Course of the
scholastic political economy—The reverse method of this work
—The conclusion the same—Reason of the disposition to in-
clude all value as wealth—Metaphorical meanings—Bull and
pun—Metaphorical meaning of wealth—Its core meaning—Its
use to express exchangeability—Similar use of money—Ordi-
mary core meaning the proper meaning of wealth—Its use in
individual economy and in political economy—What is meant
by increase of wealth—Wealth and labor—Its factors nature
and man—Wealth their resultant—Of Adam Smith—Danger
of carrying into political economy a meaning proper in indi-
vidual economy—Example of "money"—"Actual wealth" and
"relative wealth"—"Value from production" and "value
from obligation"—The English tongue has no single word for
an article of wealth—Of "commodities"—Of "goods"—Why
there is no singular in English—The attempt to form one by
dropping the "s" and Anglo-German jargon . . . . 270

CHAPTER XVI.
THE GENESIS OF WEALTH.
SHOWING HOW WEALTH ORIGINATES AND WHAT IT ESSENC-
Tially IS.

Reason of this inquiry—Wealth proceeds from exertion prompted
by desire, but all exertion does not result in wealth—Simple
examples of action, and of action resulting in wealth—"Rid-
ing and tying"—Sub-divisions of effort resulting in increments
of wealth—Wealth essentially a stored and transferable ser-
vice—Of transferable service—The action of reason as natural,
though not as certain and quick as that of instinct—Wealth
is service impressed on matter—Must be objective and have
tangible form . . . . . . . . . . . . . . . 285

CHAPTER XVII.
THE WEALTH THAT IS CALLED CAPITAL.
SHOWING WHAT THE WEALTH CALLED CAPITAL REALLY IS.

Capital is a part of wealth used indirectly to satisfy desire—
Simple illustration of fruit—Wealth permits storage of labor—
The bull and the man—Exertion and its higher powers—Per-
GENERAL CONTENTS.

sonal qualities cannot really be wealth or capital—The taboo
and its modern form—Common opinion of wealth and capital 293

CHAPTER XVIII.
WHY POLITICAL ECONOMY CONSIDERS ONLY WEALTH.

SHOWING THAT POLITICAL ECONOMY, AS PROPERLY STATED,
COVERS ALL THE RELATIONS OF MEN IN SOCIETY INTO WHICH
IT IS NECESSARY TO INQUIRE.

Political economy does not include all the exertions for the
satisfaction of material desires; but it does include the greater
part of them, and it is through value that the exchange of
services for services is made—Its duty and province . . . 301

CHAPTER XIX.
MORAL CONFUSIONS AS TO WEALTH.

SHOWING HOW RICH AND POOR ARE CORRELATIVES, AND
WHY CHRIST SYMPATHIZED WITH THE POOR.

The legitimacy of wealth and the disposition to regard it as
scourge and mean—The really rich and the really poor—They
are really correlatives—The good sense of Christ's teaching . . . 304

CHAPTER XX.
OF THE PERMANENCE OF WEALTH.

SHOWING THAT VALUES FROM OBLIGATION SEEM REALLY TO
LAST LONGER THAN VALUES FROM PRODUCTION.

Value from production and value from obligation—The one
material and the other existing in the spiritual—Superior
permanence of the spiritual—Shakespeare's boast—Mecenea's
buildings and Horace's odes—The two values now existing—
Franchises and land values last longer than gold and gems—
Destruction in social advance—Conclusions from all this . . . 308

CHAPTER XXI.
THE RELATION OF MONEY TO WEALTH.

SHOWING THAT SOME MONEY IS AND SOME MONEY IS NOT
WEALTH.

Where I shall treat of money—No categorical answer can yet
be given to the question whether money is wealth—Some
money is and some is not, wealth . . . . . 313
BOOK III.
THE PRODUCTION OF WEALTH.

CHAPTER I.
THE MEANING OF PRODUCTION.
SHOWING THE MEANING AND PROPER USE OF PRODUCTION.

Production a drawing forth of what before exists—Its difference from creation—Production other than of wealth—Includes all stages of bringing to be—Mistakes as to it 328

CHAPTER II.
THE THREE MODES OF PRODUCTION.
SHOWING THE COMMON CHARACTER, YET DIFFERENT MODES OF PRODUCTION.

Production involves change, brought about by conscious will—Its three modes: (1) adapting, (2) growing, (3) exchanging—This the natural order of these modes 327

CHAPTER III.
POPULATION AND SUBSISTENCE.
SHOWING THAT THE THEORY OF A TENDENCY IN POPULATION TO INCREASE FASTER THAN SUBSISTENCE HAS PREVIOUSLY BEEN EXAMINED AND CONDEMned.

The Malthusian theory—Discussed in “Progress and Poverty” 333

CHAPTER IV.
THE ALLEGED LAW OF DIMINISHING RETURNS IN AGRICULTURE.
SHOWING WHAT THIS ALLEGED LAW IS.

John Stuart Mill quoted as to the importance, relations and nature of this law—The *reductio ad absurdum* by which it is proved—Contention that it is a misapprehension of the universal law of space 335
CHAPTER V.

OF SPACE AND TIME.

SHOWING THAT HUMAN REASON IS ONE, AND SO FAR AS IT CAN GO MAY BE RELIRED ON.

Purpose of this work—Of metaphysics—Danger of thinking of words as things—Space and time not conceptions of things, but of relations of things—They cannot, therefore, have independent beginning or ending—The verbal habit which favors this idea—How favored by poets and by religious teachers—How favored by philosophers—Of Kant—Of Schopenhauer—Mysteries and anologies that are really confusions in the meaning of words—Human reason and the eternal reason—Philosophers who are really word-jugglers . . . . 339

CHAPTER VI.

CONFUSION OF THE SPACIAL LAW WITH AGRICULTURE.

SHOWING THE GENESIS OF THIS CONFUSION.

What space is—The place to which man is confined—Extension a part of the concept, land—Perception is by contact—Man's first use of land is by the mode of adapting—His second, and for a long time most important, use is by growing—The third, on which civilization is now entering, is exchanging—Political economy began in the second, and growing still attracts most attention—The truth and error of the Physiocrats—The successors of Smith, while avoiding the error of the Physiocrats, also ignored their truth; and with their acceptance of the Malthusian theory, and Ricardo's explanation of rent as relating to agricultural land, they fell into, and have continued the habit of treating land and rent as agricultural—Difficulty of the single tax in the United States . . . . . . 351

CHAPTER VII.

THE RELATION OF SPACE IN PRODUCTION.

SHOWING THAT SPACE HAS RELATION TO ALL MODES OF PRODUCTION.

Matter being material, space must have relation to all production—This relation readily seen in agriculture—The concentration of labor in agriculture tends up to a certain point to increase and then to diminish production—But it is a misapprehension to attribute this law to agriculture or to the mode of growing—it holds in all modes and sub-divisions of
these modes—Instances: of the production of brick, of the mere storage of brick—Man himself requires space—The division of labor as requiring space—intensive and extensive use of land 357

CHAPTER VIII.
THE RELATION OF TIME IN PRODUCTION.
SHOWING THAT ALL MODES OF PRODUCTION HAVE RELATION TO TIME.

Difference between apprehensions of space and time, the one objective, the other subjective—Of spirits and of creation—All production requires time—The concentration of labor in time . . . . . . . . . . . . . . . . . . . . . . 365

CHAPTER IX.
COÖPERATION—ITS TWO WAYS.
SHOWING THE TWO WAYS OF COÖPERATION.

Coöperation is the union of individual powers in the attainment of common ends—Its ways and their analogues: (1) the combination of effort; (2) the separation of effort—Illustrations: of building houses, of joint-stock companies, etc.—Of sailing a boat—The principle shown in naval architecture—The Erie Canal—The baking of bread—Production requires conscious thought—The same principle in mental effort—What is on the one side separation is on the other concentration—Extent of concentration and specialization of work in modern civilization—The principle of the machine—Beginning and increase of division of labor—Adam Smith's three heads—a better analysis . . . . . . . . . . . . . . . . . . . . . . 371

CHAPTER X.
COÖPERATION—ITS TWO KINDS.
SHOWING THE TWO KINDS OF COÖPERATION, AND HOW THE POWER OF THE ONE GREATLY EXCEEDS THAT OF THE OTHER.

The kind of coöperation which, as to method of union or how of initiation, results from without and may be called directed or conscious coöperation—Another proceeding from within which may be called spontaneous or unconscious coöperation—Types of the two kinds and their analogues—Yielding of a full-rigged ship and of a bird—Intelligence that suffices for the one impossible for the other—The savage and the ship—Unconscious coöperation required in ship-building—Conscious coöperation will not suffice for the work of unconscious—The fatal defect of socialism—The reason of this is that the power of thought is spiritual and cannot be fused as can physical
CHAPTER XI.

THE OFFICE OF EXCHANGE IN PRODUCTION.

SHOwing THAT IN MAN THE LACK OF INSTINCT IS SUPPLIED
BY THE HIGHER QUALITY OF REASON, WHICH LEADS TO EX-
CHANGE.

The cooperation of ants and bees is from within and not from
without; from instinct and not from direction—Man has little
instinct; but the want supplied by reason—Reason shows
itself in exchange—This suffices for the unconscious coopera-
tion of the economic body or Greater Leviathan—Of the three
modes of production, exchanging is the highest—Mistake of
writers on political economy—The motive of exchange

CHAPTER XII.

OFFICE OF COMPETITION IN PRODUCTION.

SHOWING THAT COMPETITION BRINGS TRADE, AND CONSE-
QUENTLY SERVICE, TO ITS JUST LEVEL.

"Competition is the life of trade," an old and true adage—The
assumption that it is an evil springs from two causes—one
bad, the other good—The bad cause at the root of protection-
ism—Law of competition a natural law—Competition neces-
sary to civilization

CHAPTER XIII.

OF DEMAND AND SUPPLY IN PRODUCTION

CHAPTER XIV.

ORDER OF THE THREE FACTORS OF PRODUCTION.

SHOWING THE AGREEMENT OF ALL ECONOMISTS AS TO THE
NAMES AND ORDER OF THE FACTORS OF PRODUCTION.

Land and labor necessary elements in production—Union of a
composite element, capital—Reason for dwelling on this agree-
ment as to order

CHAPTER XV.

THE FIRST FACTOR OF PRODUCTION—LAND.

SHOWING THAT LAND IS THE NATURAL OR PASSIVE FACTOR
IN ALL PRODUCTION.

The term land—Landowners—Labor the only active factor
CHAPTER XVI.
THE SECOND FACTOR OF PRODUCTION—LABOR.
SHOWING THAT LABOR IS THE HUMAN OR ACTIVE FACTOR
IN ALL PRODUCTION.

The term labor—It is the only active factor in producing wealth,
and by nature spiritual 411

CHAPTER XVII.
THE THIRD FACTOR OF PRODUCTION—CAPITAL.
SHOWING THAT CAPITAL IS NOT A PRIMARY FACTOR, BUT PROCEEDS
FROM LAND AND LABOR, AND IS A FORM OR USE OF WEALTH.

Capital is essentially labor raised to a higher power—Where it
may, and where it must aid labor—in itself it is helpless 413

BOOK IV.
THE DISTRIBUTION OF WEALTH.

INTRODUCTION TO BOOK IV 421

CHAPTER I.
THE MEANING OF DISTRIBUTION.
SHOWING THE MEANING AND USES OF THE WORD DISTRIBUTION;
THE PLACE AND MEANING OF THE ECONOMIC TERM; AND THAT
IT IS CONCERNED ONLY WITH NATURAL LAWS.

Derivation and uses of the word—Exchange, consumption and
taxation not proper divisions of political economy—Need of a
consideration of distribution—It is the continuation and end
of what begins in production, and thus the final division of
political economy—The meaning usually assigned to distribu-
tion as an economic term, and its true meaning 423

CHAPTER II.
THE NATURE OF DISTRIBUTION.
SHOWING THE FALLACY OF THE CONTENTION THAT DISTRIBUTION
IS A MATTER OF HUMAN LAW; THAT THE NATURAL LAWS OF
DISTRIBUTION ARE MANIFEST NOT ON WEALTH ALREADY PRO-
DUCED, BUT ON SUBSEQUENT PRODUCTION; AND THAT THEY ARE
MORAL LAWS.

John Stuart Mill's argument that distribution is a matter of hu-
man law—Its evidence of the unscientific character of the
scholastic economy—The fallacy it involves and the confusion it shows—Illustration from Bedouin and from civilized society—Natural laws of distribution do not set upon wealth already produced, but on future production—Reason of this—Illustration of siphon and analogy of blood 430

CHAPTER III.
THE COMMON PERCEPTION OF NATURAL LAW IN DISTRIBUTION.
SHOWING THE COMMON AND INERADICABLE PERCEPTION OF NATURAL LAWS OF DISTRIBUTION.
Mill's admission of natural law in his argument that distribution is a matter of human law—Sequence and consequence—Human will and the will manifest in nature—Inflexibility of natural laws of distribution—Human will powerless to affect distribution—This shown by attempts to affect distribution through restriction of production—Mill's confusion and his high character 440

CHAPTER IV.
THE REAL DIFFERENCE BETWEEN LAWS OF PRODUCTION AND OF DISTRIBUTION.
SHOWING THAT DISTRIBUTION HAS REFERENCE TO ETHIC, WHILE PRODUCTION HAS NOT.
The laws of production are physical laws; the laws of distribution moral laws, concerned only with spirit—This the reason why the immutable character of the laws of distribution is more quickly and clearly recognized 450

CHAPTER V.
OF PROPERTY.
SHOWING THAT PROPERTY DEPENDS UPON NATURAL LAW.
The law of distribution must be the law which determines ownership—John Stuart Mill recognizes this; but extending his error, treats property as a matter of human institution solely—His assertion quoted and examined—His utilitarianism—His further contradictions 454

CHAPTER VI.
CAUSE OF CONFUSION AS TO PROPERTY.
SHOWING WHY AND HOW POLITICAL ECONOMISTS FELL INTO SUCH CONFUSIONS WITH REGARD TO PROPERTY.
Mill blinded by the pre-assumption that land is property—He all but states later the true principle of property, but recovers by
substituting in place of the economic term "land," the word in its colloquial use—The different senses of the word illustrated from the shore of New York harbor—Mill attempts to justify property in land, but succeeds only in justifying property in wealth...

BOOK V.

MONEY—THE MEDIUM OF EXCHANGE AND MEASURE OF VALUE.

INTRODUCTION TO BOOK V. ...

CHAPTER I.

CONFUSIONS AS TO MONEY.

SHOWING THE DIVERGENCE IN COMMON THOUGHT AND AMONG ECONOMISTS AS TO MONEY.

Present confusions as to money—Their cause—How to disentangle them...

CHAPTER II.

THE COMMON UNDERSTANDING OF MONEY.

SHOWING THAT THE COMMON USE OF MONEY IS TO BUY THINGS WITH, AND THAT ITS ESSENTIAL CHARACTER IS NOT IN ITS MATERIAL, BUT IN ITS USE.

The use of money to exchange for other things—Buying and selling—Illustration of the traveler's—Money not more valuable than other things, but more readily exchangeable—Exchanges without money—Checks, etc., not money—Different money in different countries—But money not made by government fiat—Does not necessarily consist of gold and silver—Or need intrinsic value—Its essential quality and definition...

CHAPTER III.

MEDIUM OF EXCHANGE AND MEASURE OF VALUE.

SHOWING HOW THE COMMON MEDIUM OF EXCHANGE BECOMES THE COMMON MEASURE OF VALUE, AND WHY WE CANNOT FIND A COMMON MEASURE IN LABOR.

Money is most exchanged—Why not measure value by labor?—Smith's unsatisfactory answer—The true answer—Labor can afford no common measure, and commodities are preferably...
CHAPTER IV.
THE OFFICE OF CREDIT IN EXCHANGES.
SHewing that the advance of civilization economizes
the use of Money.
Tendency to over-estimate the importance of money—Credit
existed before the use of money began—and it is now and
always has been the most important instrument of exchange—
Illustration of shipwrecked men—Adam Smith’s error as to
barter—Money’s most important use to-day is as a measure of
value

CHAPTER V.
THE GENESIS OF MONEY.
SHewing that the law of gratifying desires with the
least exertion prompts the use from time to time of
the most labor-saving medium available.
Money not an invention, but developed by civilization—It grows
with the growth of exchanges—Exchange first of general com-
modities—Then of the more convenient commodities—Then
of coin, whose commodity value comes to be forgotten—Illu-
stration of the American trade dollar—The lessening uses of
commodity money and extensions of credit money—Two ele-
ments in exchange value of metal coin: intrinsic, or value of
the metal itself; and seigniorage—Meaning of seigniorage—
Exchange value of paper money is seigniorage—Use of money
is not for consumption, but exchange—Proprietary articles as
mediae of exchange—Mutilated coins—When lessening metal
value in coins does not lessen circulating value—The essential
being that both represent the same exertion—This the reason
why paper money exchanges equally with metal money of like
denomination

CHAPTER VI.
THE TWO KINDS OF MONEY.
SHewing that one originates in value from produc-
tion and the other in value from obligation.
Money peculiarly the representative of value—Two kinds of
money in the more highly civilized world—Commodity money
and value from production—Credit money and value from obli-
gation—Of credit money—Of commodity money—Of intrinsic
value—Gold coin the only intrinsic value money now in cir-
culation in the United States, England, France or Germany 528
